OBJECTIVE

M.Sc. Artificial Intelligence student with hands-on experience in building complete, production-ready applications — mobile apps, web apps and admin panels — using AI-assisted development. Looking for internships and entry-level opportunities where I can contribute to real-world technology solutions and keep growing in the tech industry.

WORK EXPERIENCE

Nexify — App & Web Developer (AI-Assisted Development) August 2026 – Present

- Built and delivered two complete, production-ready products end to end — from planning and features to security testing, performance testing and final handover.
- **Apni Dukaan** — retail shop management platform: Flutter mobile app + React admin panel. Offline-first GST billing, inventory with barcode support, credit ledger (udhaar), 12 Indian languages, subscription plans with Razorpay payments. 390+ automated tests; full security audit done.
- **RestoManager** — restaurant management platform: Flutter app (Android + iOS) + admin website. Multi-restaurant SaaS with billing, KOT, inventory, staff roles, QR-code customer ordering and 3 languages. Released as v1.0.1 after 50 build-and-test phases, including security and load testing.

INTERNSHIPS

AI Intern — Agnirva AI Internship Program (Agnirva / Fromerkit Internet OPC Pvt. Ltd.) Summer 2025

- Completed a structured AI internship focused on core concepts of artificial intelligence and their practical applications, with hands-on experience in AI tools.

Business Development Specialist — Younity.in October 2023

- 14-day internship: market research, identifying growth opportunities; generated revenue of ₹4,050.

EDUCATION

M.Sc. Artificial Intelligence (pursuing, Sem 1) — AURO University 2026–2028

B.Sc. Information Technology — Shree L.R. Tiwari Degree College 2023–2026

12th (Science) — Shree L.R. Tiwari Junior College 2023

10th — St. Xavier's High School 2021

PROJECTS

Timetable Management System Personal, 2026

- Complete college timetable software for Admin, HOD and Teacher roles — FastAPI, React, Supabase, Gemini AI.
- Automatic timetable generation with real scheduling rules, clash detection, one-tap teacher substitution with notifications, PDF/Excel reports and an AI assistant that understands plain commands.
- 1,000+ automated tests; security (penetration-style) and load testing done; built on my college's real data.

Local Business Lead Finder Personal, 2026

- Web tool that finds local businesses by category and area and saves them as leads (name, address, phone, rating) — React, Node.js (Express), SQLite, map view (OpenStreetMap + Leaflet); covers 28 states, 250+ cities, 83 categories; duplicate-safe, cost-smart data design.

Smart Vault College Project, B.Sc. IT

- Bank management website handling accounts, loans and other banking operations with a secure, user-friendly interface.

SKILLS

AI-Assisted Development: building full production apps end to end using AI coding tools (Claude Code, Gemini API, Google AI Studio) — planning, prompting, testing and release.

Programming Languages: Python, Java, C/C++, HTML, CSS, JavaScript.

Areas: Artificial Intelligence (AI), Internet of Things (IoT), Full Stack Web Development.

Soft Skills: Leadership, Communication, Problem Solving, Teamwork.

TOOLS & TECHNOLOGIES

Flutter, FastAPI, React, Supabase, Google Firebase, Git & GitHub, Android Studio, Visual Studio Code, Google AI Studio, Power BI, Excel, PowerPoint.
